**Average per Person:**        **5.37**

**Apparatus Certifications:**      **00**

**Rider Certifications:**           **06**

**Courses Completed:**            **N/A**

During the month of August crews continue working towards the annual apparatus recertification practical process, over-seen by the shift's Field Training Officers. Crews also completed 4 Target Solutions online classes, not counting the EMT recertification assignments. These classes are applicable towards the EMT, Instructor and Inspector CEU requirements, and are usable towards recertification of each. Next, the Inspector from the State Fire Marshal's Office completed the last of six classes here at Southern Manatee on boiler systems safety. Also, this month, the Training Director held 6 classes to instruct all of the crews on how to enter daily training and other data into Target Solutions for ISO credit. Next month, each shift's representative from the Safety Committee is going to teach an in-service class to their shift, in hopes of preventing future accidents and injuries.

**Sept's Training Topics:**
